Author: Shintaro Miyazaki

Lüneburg: meson press eG, 2023

<https://doi.org/10.14619/0481>

Digitality is imposed upon us! To change this, we should not turn away from it, but look carefully into its transformative power and make operable alternatives such as counter-algorithms and solidarity-oriented commoning. The aim is a world where profit and property no longer exist, but instead where a cooperative dance – between all the needs posed by our ecosystems, and all the needs of people – becomes practicable. This book is a critical media theory of future-building, modulated by a focus on the potentials of counter-dancing as providing ways to unfold fugitive practices.

Author: Yankev Leshchinsky

Editor: Robert Brym

Translator: Robert Brym

Translator: Eli Jany

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0341>

Ukrainian-born Yankev Leshchinsky (1876–1966) was the leading scholarly and journalistic analyst of Eastern European Jewish socioeconomic and political life from the 1920s to the 1950s. Known as “the dean of Jewish sociologists” and “the father of Jewish demography,” Leshchinsky published a series of insightful and moving essays in Yiddish on Polish Jewry between 1927 and 1937. Despite heightened interest in interwar Jewish communities in Poland in recent years, these essays (like most of Leshchinsky’s works) have never been translated into English. *The Last Years of Polish Jewry* helps to rectify this situation by translating some of Leshchinsky’s key essays.

2.3.6 Susan Isaacs: A Life Freeing the Minds of Children

Author: Philip Graham

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0297>

This revised and expanded edition of *Susan Isaacs: A Life Freeing the Minds of Children* by Philip Graham, provides a comprehensive biography of a highly influential educationist and psychoanalyst. The book covers Isaacs’ childhood through to the end of her life, making it of great interest to historians of British education and of psychoanalysis as well as to practicing early years teachers and psychoanalysts.

2.3.7 The Poetic Edda: A Dual-Language Edition

Author: Edward Pettit

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0308>

2.4.3 Preferable Futures

Editor: Irina Kaldrack

Editor: Rolf F. Nohr

<https://doi.org/10.14619/0337>

2.4.4 Kritik postdigital

Editor: Laura Hille

Editor: Daniela Wentz

Lüneburg: meson press eG, 2023

<https://doi.org/10.14619/0832>

Die realpolitische Affirmation der Universalität des Digitalen geht mit einer regelrechten Abwehr der kritischen Reflexion seiner scheinbaren Axiome einher. Umso dringlicher ist es zu fragen: Was sind die Bedingungen und Möglichkeiten von Kritik am Digitalen und seiner Kulturen? Wie lässt sich die drängende Notwendigkeit politischer Haltung und kritischer Praxis mit einem wissenschaftlichen Einsatz verbinden, der die Eigengesetzlichkeiten des Digitalen ernst nimmt? Die Beiträge in Kritik postdigital begegnen diesen Herausforderungen aus sozial-, medienwissenschaftlicher und philosophischer Perspektive.

2.4.5 Dire Straits-Education Reforms: Ideology, Vested Interests and Evidence

Author: José Ignacio Wert

Author: Montserrat Gomendio

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0332>

Responding to an ‘educational emergency’ generated largely by the difficulties of implementing education reforms, this book compares education policies around the world in order to understand what works where. To address the key question of why education reforms are so difficult, the authors take into account a broad range of relevant factors, such as governance, ideology, and stakeholder conflicts of interest, and their interactions with one another.

2.4.6 The Historical Depth of the Tiberian Reading Tradition of Biblical Hebrew

Author: Aaron D. Hornkohl

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0310>

This volume explores an underappreciated feature of the standard Tiberian Masoretic tradition of Biblical Hebrew, namely its composite nature. Focusing on cases of dissonance between the tradition’s written (consonantal) and reading (vocalic) components, the study shows that the Tiberian spelling and pronunciation traditions, though related, interdependent, and largely in harmony, at numerous points reflect distinct oral realisations of the biblical text.

This book focuses on digital approaches to capacity development, reflecting the greater interest in how digital tools and platforms can be used for capacity development in the ‘Global South’. While Covid-19 demonstrated some of the benefits of online learning, the widespread, often uncritical adoption of online tools driven by necessity has left many with an experience of ‘emergency online learning’. This book aims to assist in the design of technology-enhanced capacity development by sharing evidence of practices that are principled rather than rushed; inclusive rather than creating new digital divides.

Part 1 sets out the main thinking that informs our overall approach and the frameworks that guide our practice. Part 2 explores a series of assumptions about technology-enhanced learning (TEL) that are common in the literature and against which we tested our data. It brings new evidence to bear on how TEL can be used more effectively as part of learning and capacity strengthening. Part 3 is designed as a practical guide to walk practitioners through the steps to create relevant, inclusive and sustainable digital learning interventions. Part 4 offers a collection of 16 case studies that illustrate how we have put the principles into practice. We have worked to evidence how technology can be leveraged effectively to enhance or strengthen capacities of individuals, teams or systems. We make clear that there are no magic bullets, that online approaches are not simply quicker or cheaper substitutes, and that solutions need to be selected carefully, designed well, and significant time invested if it is to work well.

We hope Digital Technology in Capacity Development will be of interest to researchers and practitioners in a range of institutions, whether they are directly responsible for designing, delivering or evaluating new initiatives or whether they are advising or funding those who do.

2.5.2 Who Counts? Ghanaian Academic Publishing and Global Science

Since the 1990s, global academic publishing has been transformed by digitisation, consolidation and the rise of the internet. The data produced by commercially owned citation indexes increasingly defines legitimate academic knowledge. Publication in prestigious ‘high impact’ journals can be traded for academic promotion, tenure and job-security. African researchers and publishers labour in the shadows of a global knowledge system dominated by ‘Northern’ journals and by global publishing conglomerates. This book goes beyond the numbers. It tells the story of how the Ghanaian academy is being transformed by this bibliometric economy. It offers a rich account of the voices and perspectives of Ghanaian academics and African journal publishers. How, where and when are Ghana’s researchers disseminating their work, and what do these experiences reveal about an unequal global science system? Is there pressure to publish in ‘reputable’ international journals, what role do supervisors, collaborators and mentors play, and how do academics manage in conditions of scarcity? Putting the insights of more than 40 Ghanaian academics into dialogue with journal editors and publishers from across the continent, the book highlights creative responses, along with the emergence of new regional research ecosystems. This is an important Africa-centred analysis of Anglophone academic publishing on the continent and its relationship to global science.

<https://doi.org/10.47622/9781928502678>

This book takes readers on a series of stimulating intellectual journeys from the late nineteenth century to the contemporary era to explore notions of modernity in the production and reception of the African moving image and of African archival practices. Ideas are presented from multiple historical and contemporary perspectives, while inviting new voices to participate in discussions about the future of the African moving image.

Reframing Africa? makes a plea for the recognition, preservation and repatriation of the African moving image archive, advancing ideas about how it speaks to contemporary Africans, possessed of the power to elucidate their lived experiences and to reorientate perceptions of the past, present and future. On the basis of this wide-ranging appreciation of the archive, the book charts a way forward for African-inflected film studies as well as other programmes in the humanities and social sciences.

Reframing Africa? will appeal to scholars, academics and practitioners across the continent and beyond.

2.6.4 Chance Encounters: A Bioethics for a Damaged Planet

Author: Kristien Hens

Illustrator: Christina Stadlbauer

Illustrator: Bart H.M. Vandeput

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0320>

In this rigorous and necessary book, Kristien Hens brings together bioethics and the philosophy of biology to argue that it is ethically necessary for scientific research to include a place for the philosopher. As well as ethical, their role is conceptual: they can improve the quality and coherence of scientific research by ensuring that particular concepts are used consistently and thoughtfully across interdisciplinary projects. Hens argues that chance and uncertainty play a central part in bioethics, but that these qualities can be in tension with the attempt to establish a given theory as scientific knowledge: in describing organisms and practices, in a sense we create the world. Hens contends that this is necessarily an ethical activity.

2.6.5 Landscapes of Investigation: Contributions to Critical Mathematics Education

Editor: Miriam Godoy Penteado

Editor: Ole Skovsmose

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0316>

Creating landscapes of investigation is a primary concern of critical mathematics education. It enables us to organise educational processes so that students and teachers are able to get involved in explorations guided by dialogical interactions. It attempts to address explicit or implicit forms of social injustice by means of mathematics, and also to promote a critical conception of mathematics, challenging the assumption that the subject represents objectivity and neutrality. Landscapes of Investigation provides many illustrations of how this can be done in primary, secondary, and university education. It also illustrates how exploring landscapes of investigation can contribute to mathematics teacher education programmes.

Marcel Cobussen intertwines sonic studies with philosophy, sound art, sociology and more to create an impressively lucid and innovative guide to sonic materialism, calling for a re-sensitization to our acoustic environment and arguing that everyday sounds have (micro)political, social, and ethical impact to which we should attend.

The Bible in the Bowls represents a complete catalogue of Hebrew Bible quotations found in the published corpus of Jewish Babylonian Aramaic magic bowls. As our only direct epigraphic witnesses to the Hebrew Bible from late antique Babylonia, the bowls are uniquely placed to contribute to research on the (oral) transmission of the biblical text in late antiquity; the pre-Masoretic Babylonian vocalisation tradition; the formation of the liturgy and the early development of the Jewish prayer book; the social locations of biblical knowledge in late antique Babylonia and socio-religious typologies of the bowls; and the dynamics of scriptural citation in ancient Jewish magic.

It is the story of their personal and collective values, their mistakes, and the challenges they faced, and it will resonate with anyone who has tried to organize and work with a group of very different people.

2.9.1 Guantánamo Frames

Author: Rebecca Boguska

Lüneburg: meson press eG, 2022

<https://doi.org/10.14619/2065>

For the last twenty years, the Guantánamo Bay detention camp has not just been a military prison and security facility, but also a site of media production. Films, photographs, and documents have continued to emerge from the camp and become the focus of fierce legal and political battles, as well as intense moral anguish. This book looks at how the US Department of Defense has struggled, and often failed, to control the public perception of these media objects through complex, layered framing devices. It traces how small ruptures in the Department's framings have provided openings for critical interventions from various fields – ranging from journalism and human rights law to the arts. Guantánamo Frames thus lays the groundwork for a critical reappraisal of the entanglement of media, violence, and the security state in a broader sense.

Author: Marie-Luise Angerer

Lüneburg: meson press eG, 2022

<https://doi.org/10.14619/2041>

Growing numbers of nonhuman companions are creating affective synching between human and nonhuman agency. Unlike the unconscious of psychoanalysis, this book argues, the resulting nonconscious is no longer coupled to a subject grounded in language, instead acting as an affective link between technical, mental, and physical processes.

Anthony Hewitson was a typical Victorian journalist, working in one of the largest sectors of the periodical press, provincial newspapers. His diaries, written between 1862 and 1912,

lift the veil of anonymity hiding the people, processes and networks involved in the creation of Victorian newspapers. Andrew Hobbs's introduction and footnotes provide background and analysis of these valuable documents. This full scholarly edition offers a wealth of new information about reporting, freelancing, sub-editing, newspaper ownership and publishing, and illuminates aspects of Victorian periodicals and culture extending far beyond provincial newspapers.

Author: Geoff Meeks

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0309>

Drawing on findings from a wealth of statistical analyses and case evidence from many businesses, the book presents answers to this merger mystery. In a synthesis of ideas from several disciplines, solutions are detected in misaligned incentives, distorted financial engineering and information asymmetry. By revealing how weaknesses at multiple points can interact and cumulate to produce inefficient outcomes, the discussion serves as a corrective to the overwhelmingly positive tone of most commentary on M&A, whilst also advocating changes in participants' contracts, in taxation, and in regulation which could significantly reduce the number of mergers that fail.

Democratic Situations places the making and doing of democratic politics at the centre of relational research. The book turns the well-known sites of contemporary Euro-American democracy – elections, bureaucracies, public debates and citizen participation – into fluctuating democratic situations where supposedly untouchable democratic ideals are contested and warped in practice. The empirical cases demonstrate that democracy cannot be reduced to theoretical schemes of conflict, institutions or deliberation. Instead, they offer an urgently needed renewal of our understanding of democratic politics at a time when conventional ideas increasingly fail to capture current events such as Brexit, Trump and Covid19.

2.13.7 Out of Place: An Autoethnography of Postcolonial Citizenship

Author: Nuraan Davids

Foreword by: Jonathan D Jansen

Cape Town: African Minds, 2022

<https://doi.org/10.47622/9781928502364>

Out of Place offers an in-depth exploration of Nuraan Davids' experience as a Muslim 'coloured' woman, traversing a post-apartheid space. It centres on and explores a number of themes, which include her challenges not only as a South African citizen, and within her faith community, but as an academic citizen at a historically white university. The book is her story, an autoethnography, her reparation.

By embarking on an auto-ethnography, she not only tries to change the way her story has been told by others, transforms her 'sense of what it means to live' (Bhabha, 1994). She is driven by a postcolonial appeal, which insists that if she seeks to imprint her own way of life into the discourses which pervade the world around her, then she can no longer allow herself to be spoken on behalf of or to be subjugated into the hegemonies of others.

The main argument of *Out of Place* is that Muslim, 'coloured' women are subjected to layers of scrutiny and prejudices, which have yet to be confronted. What we know about Muslim 'coloured' women has been shaped by preconceived notions of 'otherness', and attached to a meta-narrative of 'oppression and backwardness'. By centring and using her lived experiences, the author takes readers on a journey of what it is like to be seen in terms of race, gender and religion – not only within the public sphere of her professional identities, but within the private sphere of her faith community.

2.13.8 Positioning Diversity in Kenyan Schools: Teaching in the Face of Inequality and Discrimination

Author: Malve von Möllendorff

South Africa: African Minds, 2022

<https://doi.org/10.47622/9781928502333>

Education is considered key for societies to achieve greater social cohesion and equality. Yet, schools, as the main providers of formal education, have increasingly come into question concerning their role in manifesting and perpetuating social categorisations, inequalities and discrimination instead of decreasing existing fragmentations and challenging power relations and hierarchies.

As a diverse society, Kenya is faced with power struggles and rivalries between different groups – for instance, along ethnic lines, often constructed deep in colonial history. This affects teaching and learning in school and the result is that Kenya is faced with vast disparities in terms of educational access and success – rendering some social groups marginalised and others favoured.

Positioning Diversity at Kenyan Schools explores the ways in which teachers in Kenyan primary and secondary schools experience and deal with social categorisations and diversity in terms of ethnicity, gender, wealth, culture, religion, etc. in their professional practice and in the current education system. Using critical pedagogy and diversity theory as a lens for positioning diversity in Kenyan schools, the questions that this book sets out to answer are: In what ways do the teachers' and schools' practices lead to transformation in terms of more social equality and less discrimination? In what ways do the practices manifest existing group categorisations, hierarchies and discrimination? How can schools and teaching practices in postcolonial Kenya become more inclusive and foster social cohesion and equality?

Author: Francesca Musiani

Foreword by: Laura DeNardis

Manchester, UK: Mattering Press, 2022

<https://doi.org/10.28938/9781912729227>

Concealing for Freedom: The Making of Encryption, Secure Messaging and Digital Liberties sets out to explore one of the core battlegrounds of Internet governance: the encryption of online communications. Current debates around encryption have fundamental implications for our individual liberties and collective presence on the Internet. Encryption of communications at scale and in increasingly usable ways has become a matter of public concern, especially since Edward Snowden's 2013 revelations. A new cryptographic imaginary is taking hold, which sees encryption as a necessary precondition for the formation of networked publics. At the same time, there have been major evolutions and accelerations in the field of secure communications, prompted in part by the cryptography community's renewed efforts to create next-generation secure messaging protocols and applications. The book explores developers' actions and their interactions with other stakeholders, for instance users, security trainers, standardising bodies, and funding organizations. It also examines their interactions with the technical artifacts they

develop, in which a core common objective is to create tools that “conceal for freedom” even as how this objective is met differs according to technical architectures, the user publics being targeted and the tools’ underlying values and business models.

This volume investigates the uptake of ‘open learning’ in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as: recognition of prior learning, access for students with disabilities, work integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development models and funding, and micro-credentials.

This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting ‘open learning’ as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser’s theory of social justice as ‘participatory parity’ to better understand the ways in which ‘open learning’ may address systemic social injustices in order to allow South African students and educators to thrive.

This volume emerges from research conducted by the Cases on Open Learning (COOL) project, an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town (UCT) in South Africa.

3.0.1 Digital Technology in Capacity Development: Enabling Learning and Supporting Change

Author: Joanna Wild

Author: Femi Nzegwu

South Africa: African Minds, 2023

<https://doi.org/10.47622/9781928502708>

This book focuses on digital approaches to capacity development, reflecting the greater interest in how digital tools and platforms can be used for capacity development in the 'Global South'. While Covid-19 demonstrated some of the benefits of online learning, the widespread, often uncritical adoption of online tools driven by necessity has left many with an experience of 'emergency online learning'. This book aims to assist in the design of technology-enhanced capacity development by sharing evidence of practices that are principled rather than rushed; inclusive rather than creating new digital divides.

Part 1 sets out the main thinking that informs our overall approach and the frameworks that guide our practice. Part 2 explores a series of assumptions about technology-enhanced learning (TEL) that are common in the literature and against which we tested our data. It brings new evidence to bear on how TEL can be used more effectively as part of learning and capacity strengthening. Part 3 is designed as a practical guide to walk practitioners through the steps to create relevant, inclusive and sustainable digital learning interventions. Part 4 offers a collection of 16 case studies that illustrate how we have put the principles into practice. We have worked to evidence how technology can be leveraged effectively to enhance or strengthen capacities of individuals, teams or systems. We make clear that there are no magic bullets, that online approaches are not simply quicker or cheaper substitutes, and that solutions need to be selected carefully, designed well, and significant time invested if it is to work well.

We hope Digital Technology in Capacity Development will be of interest to researchers and practitioners in a range of institutions, whether they are directly responsible for designing, delivering or evaluating new initiatives or whether they are advising or funding those who do.

3.0.2 Who Counts? Ghanaian Academic Publishing and Global Science

Since the 1990s, global academic publishing has been transformed by digitisation, consolidation and the rise of the internet. The data produced by commercially owned citation indexes increasingly defines legitimate academic knowledge. Publication in prestigious ‘high impact’ journals can be traded for academic promotion, tenure and job-security. African researchers and publishers labour in the shadows of a global knowledge system dominated by ‘Northern’ journals and by global publishing conglomerates. This book goes beyond the numbers. It tells the story of how the Ghanaian academy is being transformed by this bibliometric economy. It offers a rich account of the voices and perspectives of Ghanaian academics and African journal publishers. How, where and when are Ghana’s researchers disseminating their work, and what do these experiences reveal about an unequal global science system? Is there pressure to publish in ‘reputable’ international journals, what role do supervisors, collaborators and mentors play, and how do academics manage in conditions of scarcity? Putting the insights of more than 40 Ghanaian academics into dialogue with journal editors and publishers from across the continent, the book highlights creative responses, along with the emergence of new regional research ecosystems. This is an important Africa-centred analysis of Anglophone academic publishing on the continent and its relationship to global science.

3.1.1 Reframing Africa? Reflections on Modernity and the Moving Image

Editor: Cynthia Kros

Editor: Reece Auguiste

Editor: Pervaiz Khan

South Africa: African Minds, 2022

<https://doi.org/10.47622/9781928502678>

This book takes readers on a series of stimulating intellectual journeys from the late nineteenth century to the contemporary era to explore notions of modernity in the production and reception of the African moving image and of African archival practices. Ideas are presented from multiple historical and contemporary perspectives, while inviting new voices to participate in discussions about the future of the African moving image.

Reframing Africa? makes a plea for the recognition, preservation and repatriation of the African moving image archive, advancing ideas about how it speaks to contemporary Africans, possessed of the power to elucidate their lived experiences and to reorientate perceptions of the past, present and future. On the basis of this wide-ranging appreciation of the archive, the book charts a way forward for African-inflected film studies as well as other programmes in the humanities and social sciences.

Reframing Africa? will appeal to scholars, academics and practitioners across the continent and beyond.

Democratic Situations places the making and doing of democratic politics at the centre of relational research. The book turns the well-known sites of contemporary Euro-American democracy – elections, bureaucracies, public debates and citizen participation – into fluctuating democratic situations where supposedly untouchable democratic ideals are contested and warped in practice. The empirical cases demonstrate that democracy cannot be reduced to theoretical schemes of conflict, institutions or deliberation. Instead, they offer an urgently needed renewal of our understanding of democratic politics at a time when conventional ideas increasingly fail to capture current events such as Brexit, Trump and Covid19.

4.1.1 Concealing for Freedom: The Making of Encryption, Secure Messaging and Digital Liberties

Author: Francesca Musiani

Author: Ksenia Ermoshina

Foreword by: Laura DeNardis

Manchester, UK: Mattering Press, 2022

<https://doi.org/10.28938/9781912729227>

Concealing for Freedom: The Making of Encryption, Secure Messaging and Digital Liberties sets out to explore one of the core battlegrounds of Internet governance: the encryption of online communications. Current debates around encryption have fundamental implications for our individual liberties and collective presence on the Internet. Encryption of communications at scale and in increasingly usable ways has become a matter of public concern, especially since Edward Snowden’s 2013 revelations. A new cryptographic imaginary is taking hold, which sees encryption as a necessary precondition for the formation of networked publics. At the same time, there have been major evolutions and accelerations in the field of secure communications, prompted in part by the cryptography community’s renewed efforts to create next-generation secure messaging protocols and applications. The book explores developers’ actions and their interactions with other stakeholders, for instance users, security trainers, standardising bodies, and funding organizations. It also examines their interactions with the technical artifacts they develop, in which a core common objective is to create tools that “conceal for freedom” even as how this objective is met differs according to technical architectures, the user publics being targeted and the tools’ underlying values and business models.

4.2.1 Engineering the Climate: Science, Politics and Visions of Control

Author: Julia Schubert

Manchester, UK: Mattering Press, 2021

<https://doi.org/10.28938/9781912729265>

Notions of the impending climate crisis have pushed a set of highly contested techno-scientific measures onto policy agendas around the world. Suggestions to deliberately alter, to engineer, the Earth's climate have gained political currency in recent years not as a positive vision of techno-scientific innovation, but as a daunting measure of last resort. The controversial status of various so-called climate engineering proposals raises a simple, yet pressing question: How has it come to this? And, more specifically, how did such contested measures earn their place on policy agendas, despite enormous scientific complexities and fierce political contestation?

Without microbes, no other forms of life would be possible. But what does it mean to be with microbes? *With Microbes* sets microbes and the multiple ways they exist around, in and on humans at center stage. In this book, 24 social scientists and artists attune to microbes and describe their complicated relationships with humans and other beings. The book shows the multiplicity of these relationships and their dynamism, through detailed ethnographies of the relationships between humans, animals, plants, and microbes. Ethnographic explorations with fermented foods, waste, faecal matter, immunity, antimicrobial resistance, phages, as well as indigenous and scientific understandings of microbes challenge ideas of them being simple entities: not just pathogenic foes, old friends or good fermentation minions, but so much more. By describing these complex, dynamic, and ever-changing entanglements between humans and microbes, the chapters raise crucial points about how microbes are ‘known’ and how social scientists can study microbes with ethnographic methods, more often than not in the absence of microscopes, models, and computations. Following these various entanglements, the book tells how these relations transform both humans and microbes in the process.

Sensing In/Security: Sensors as Transnational Security Infrastructures investigates how sensors and sensing practices enact regimes of security and insecurity. It extends long-standing concerns with infrastructuring to emergent modes of surveillance and control by exploring how digitally networked sensors shape securitisation practices. Contributions in this volume examine how sensing devices gain political and epistemic relevance in various forms of in/security, from border control, regulation, and epidemiological tracking, to aerial surveillance and hacking. Instead of focusing on specific sensory devices and their consequences, this volume explores the complex and sometimes invisible political, cultural and ethical processes of infrastructuring in/security.

A book full of boxes. A box in itself. An unboxing. This book explores boxes in their broadest sense and size. It invites us to step into the field, unravel how and why things are contained and how it might be otherwise. By turning the focus of Science and Technology Studies (STS) to boxing practices, this collation of essays examines boxes as world-making devices.

4.7.1 An Anthropology of Common Ground: Awkward Encounters in Heritage Work

Author: Nathalia Brichet

Manchester: Mattering Press, 2018

<https://doi.org/10.28938/9780995527799>

Paying attention to details and ‘small stories’ as that which make worlds (heritage projects as well as ethnography), the book proposes a kind of postcolonial scholarship. Rather than uncovering or building up one story about the Danish-Ghanaian past, the work insists on providing ‘inconclusive’ analyses, collaboratively generated in the course of the project work

and in the process of writing ethnographically about it. The ambition is to nurture fieldwork as an opportunity for creating a common ground, on which to think about what heritage and ethnography could be. Common ground, then, is not only an ideal of the joint heritage project, but an expression of an anthropological ambition. In consequence, the book is an account of a particular ethnographic research project – the ‘methods story’ being about how post-colonial relations might be noticed and supported and about how empirical research is done as relations between what is going on in the field and the way that the ethnographer chooses to tell the story of the field in the text.

Inventing the Social, edited by Noortje Marres, Michael Guggenheim and Alex Wilkie, showcases recent efforts to develop new ways of knowing society that combine social research with creative practice. With contributions from leading figures in sociology, architecture, geography, design, anthropology, and digital media, the book provides practical and conceptual pointers on how to move beyond the customary distinctions between knowledge and art, and on how to connect the doing, researching and making of social life in potentially new ways.

Presenting concrete projects with a creative approach to researching social life as well as reflections on the wider contexts from which these projects emerge, this collection shows how collaboration across social science, digital media and the arts opens up timely alternatives to narrow, instrumentalist proposals that seek to engineer behaviour and to design community from scratch. To invent the social is to recognise that social life is always already creative in itself and to take this as a starting point for developing different ways of combining representation and intervention in social life.

How might we think differently? This book is an attempt to respond to this question. Its contributors are all interested in non-standard modes of knowing. They are all more or less uneasy with the restrictions or the agendas implied by academic modes of knowing, and they have chosen to do this by working with, through, or against one important Western alternative — that of the baroque.

6.0.1 Counter-Dancing Digitality: On Commoning and Computation

Author: Shintaro Miyazaki

Lüneburg: meson press eG, 2023

<https://doi.org/10.14619/0481>

Digitality is imposed upon us! To change this, we should not turn away from it, but look carefully into its transformative power and make operable alternatives such as counter-algorithms and solidarity-oriented commoning. The aim is a world where profit and property no longer exist, but instead where a cooperative dance – between all the needs posed by our ecosystems, and all the needs of people – becomes practicable. This book is a critical media theory of future-building, modulated by a focus on the potentials of counter-dancing as providing ways to unfold fugitive practices.

Editor: Laura Hille

Editor: Daniela Wentz

Lüneburg: meson press eG, 2023

<https://doi.org/10.14619/0832>

Die realpolitische Affirmation der Universalität des Digitalen geht mit einer regelrechten Abwehr der kritischen Reflexion seiner scheinbaren Axiome einher. Umso dringlicher ist es zu fragen: Was sind die Bedingungen und Möglichkeiten von Kritik am Digitalen und seiner Kulturen? Wie lässt sich die drängende Notwendigkeit politischer Haltung und kritischer Praxis mit einem wissenschaftlichen Einsatz verbinden, der die Eigengesetzlichkeiten des Digitalen ernst nimmt? Die Beiträge in Kritik postdigital begegnen diesen Herausforderungen aus sozial-, medienwissenschaftlicher und philosophischer Perspektive.

6.3.1 Guantánamo Frames

Author: Rebecca Boguska

Lüneburg: meson press eG, 2022

<https://doi.org/10.14619/2065>

For the last twenty years, the Guantánamo Bay detention camp has not just been a military prison and security facility, but also a site of media production. Films, photographs, and documents have continued to emerge from the camp and become the focus of fierce legal and political battles, as well as intense moral anguish. This book looks at how the US Department of Defense has struggled, and often failed, to control the public perception of these media objects through complex, layered framing devices. It traces how small ruptures in the Department's framings have provided openings for critical interventions from various fields – ranging from journalism and human rights law to the arts. Guantánamo Frames thus lays the groundwork for a critical reappraisal of the entanglement of media, violence, and the security state in a broader sense.

Author: Marie-Luise Angerer

Growing numbers of nonhuman companions are creating affective synching between human and nonhuman agency. Unlike the unconscious of psychoanalysis, this book argues, the resulting nonconscious is no longer coupled to a subject grounded in language, instead acting as an affective link between technical, mental, and physical processes.

Digitization carries the utopian promise of archival access unlimited by constraints of space and time, and with it, of new forms of research and historiographies. In reality, digital image archives pose a complex set of technical, legal, ethical and methodological challenges, particularly for film and media studies and adjacent fields. In a series of studies and interviews with practitioners, scholars and theorists, this volume draws a detailed map of these challenges and offers perspectives for further research and creative practice.

In a world undergoing constant media-driven change, the infrastructures, materialities, and temporalities of remains have become urgent. This book engages with the remains and remainders of media cultures through the lens both of theater and performance studies and of media archaeology. By taking “remain” as a verb, noun, state, and process of becoming, the authors explore the epistemological, social, and political implications.

7.1.1 Introduction to Systems Biology: Workbook for Flipped-classroom Teaching

Author: Marco Albrecht

Author: Thomas Sauter

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0291>

7.1.2 The Last Years of Polish Jewry: Volume 1: At the Edge of the Abyss: Essays, 1927–33

Author: Yankev Leshchinsky

Editor: Robert Brym

Translator: Robert Brym

Translator: Eli Jany

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0341>

Ukrainian-born Yankev Leshchinsky (1876–1966) was the leading scholarly and journalistic analyst of Eastern European Jewish socioeconomic and political life from the 1920s to the 1950s. Known as “the dean of Jewish sociologists” and “the father of Jewish demography,” Leshchinsky published a series of insightful and moving essays in Yiddish on Polish Jewry between 1927 and 1937. Despite heightened interest in interwar Jewish communities in Poland in recent years, these essays (like most of Leshchinsky’s works) have never been translated into English. *The Last Years of Polish Jewry* helps to rectify this situation by translating some of Leshchinsky’s key essays.

7.1.3 Susan Isaacs: A Life Freeing the Minds of Children

<https://doi.org/10.11647/OBP.0297>

This revised and expanded edition of *Susan Isaacs: A Life Freeing the Minds of Children* by Philip Graham, provides a comprehensive biography of a highly influential educationist and psychoanalyst. The book covers Isaacs’ childhood through to the end of her life, making it of great interest to historians of British education and of psychoanalysis as well as to practicing early years teachers and psychoanalysts.

Editor: Juan Luis Simal

Editor: Sylvain Lesage

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0323>

7.2.2 Dire Straits-Education Reforms: Ideology, Vested Interests and Evidence

Author: José Ignacio Wert

Author: Montserrat Gomendio

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0332>

Responding to an ‘educational emergency’ generated largely by the difficulties of implementing education reforms, this book compares education policies around the world in order to understand what works where. To address the key question of why education reforms are so difficult, the authors take into account a broad range of relevant factors, such as governance, ideology, and stakeholder conflicts of interest, and their interactions with one another.

7.2.3 The Historical Depth of the Tiberian Reading Tradition of Biblical Hebrew

Author: Aaron D. Hornkohl

Cambridge, UK: Open Book Publishers, 2023

<https://doi.org/10.11647/OBP.0310>

This volume explores an underappreciated feature of the standard Tiberian Masoretic tradition of Biblical Hebrew, namely its composite nature. Focusing on cases of dissonance between the tradition’s written (consonantal) and reading (vocalic) components, the study shows that the Tiberian spelling and pronunciation traditions, though related, interdependent, and largely in harmony, at numerous points reflect distinct oral realisations of the biblical text.

7.4.1 Landscapes of Investigation: Contributions to Critical Mathematics Education

Editor: Miriam Godoy Penteado

Editor: Ole Skovsmose

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0316>

Creating landscapes of investigation is a primary concern of critical mathematics education. It enables us to organise educational processes so that students and teachers are able to get involved in explorations guided by dialogical interactions. It attempts to address explicit or implicit forms of social injustice by means of mathematics, and also to promote a critical conception of mathematics, challenging the assumption that the subject represents objectivity and neutrality. Landscapes of Investigation provides many illustrations of how this can be done in primary, secondary, and university education. It also illustrates how exploring landscapes of investigation can contribute to mathematics teacher education programmes.

7.4.2 Chance Encounters: A Bioethics for a Damaged Planet

Author: Kristien Hens

Illustrator: Christina Stadlbauer

Illustrator: Bart H.M. Vandeput

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0320>

In this rigorous and necessary book, Kristien Hens brings together bioethics and the philosophy of biology to argue that it is ethically necessary for scientific research to include a place for the philosopher. As well as ethical, their role is conceptual: they can improve the quality and coherence of scientific research by ensuring that particular concepts are used consistently and thoughtfully across interdisciplinary projects. Hens argues that chance and uncertainty play a central part in bioethics, but that these qualities can be in tension with the attempt to establish a given theory as scientific knowledge: in describing organisms and practices, in a sense we create the world. Hens contends that this is necessarily an ethical activity.

7.4.3 Greening Europe: 2022 European Public Investment Outlook

Editor: Floriana Cerniglia

Editor: Francesco Saraceno

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0328>

The third installment of the ‘European Public Investment Outlook’ series is an important and timely publication that draws together recent analyses to recommend significant increases in public investment in green ventures. Compelling data from key economists affiliated with international organizations like the International Monetary Fund, European Investment Bank and the European Commission, as well as academic departments and policy institutes are a clarion call for green investment to boost the economy and put the planet on a sustainable path.

7.4.4 Music in Evolution and Evolution in Music

Author: Steven Jan

Cambridge, UK: Open Book Publishers, 2022

<https://doi.org/10.11647/OBP.0301>

Music in Evolution and Evolution in Music by Steven Jan is a comprehensive account of the relationships between evolutionary theory and music. Examining the ‘evolutionary algorithm’ that drives biological and musical-cultural evolution, the book provides a distinctive commentary on how musicality and music can shed light on our understanding of Darwin’s famous theory – and vice-versa.

7.4.5 Transforming Conservation: A Practical Guide to Evidence and Decision Making

Editor: William J. Sutherland

Cambridge, UK: Open Book Publishers, 2022

The nineteenth century witnessed a series of revolutions in the production and circulation of images. From lithographs and engraved reproductions of paintings to daguerreotypes, stereoscopic views, and mass-produced sculptures, works of visual art became available in a wider range of media than ever before. But the circulation and reproduction of artworks also raised new questions about the legal rights of painters, sculptors, engravers, photographers, architects, collectors, publishers, and subjects of representation (such as sitters in paintings or photographs). This volume brings together a collection of seven articles previously published by the author, with a new introduction reframing the articles in the context of past and present questions in anthropology, psychology and human evolution. It promotes the perspective of ‘integrated’ social science, in which social science questions are addressed in a deliberately eclectic manner, combining results and models from evolutionary biology, experimental psychology, economics, anthropology and history.

Editor: Timothy Langen

Editor: Muireann Maguire

Cambridge, UK: Open Book Publishers, 2021

<https://doi.org/10.11647/OBP.0241>

This edited volume employs the paradoxical notion of ‘anticipatory plagiarism’—developed in the 1960s by the ‘Oulipo’ group of French writers and thinkers—as a mode for reading Russian literature. Reversing established critical approaches to the canon and literary influence, its contributors ask us to consider how reading against linear chronologies can elicit fascinating new patterns and perspectives.

Cambridge, UK: Open Book Publishers, 2021

This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations. Informed by postphenomenology, media ecology, philosophical posthumanism, and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect—and are affected by—our relations with media technology.

Author: Adam Roberts

Cambridge, UK: Open Book Publishers, 2021

<https://doi.org/10.11647/OBP.0249>

In Middlemarch, George Eliot draws a character passionately absorbed by abstruse allusion and obscure epigraphs. Casaubon's obsession is a cautionary tale, but Adam Roberts nonetheless sees in him an invitation to take Eliot's use of epigraphy and allusion seriously, and this book is an attempt to do just that.

'Eternity is in love with the productions of time'. This original edited volume takes William Blake's aphorism as a basis to explore how British Romantic literature creates its own sense of time. It considers Romantic poetry as embedded in and reflecting on the march of time, regarding it not merely as a reaction to the course of events between the late-eighteenth and mid-nineteenth centuries, but also as a form of creative engagement with history in the making.

Editor: Emily Wilbourne

Editor: Suzanne G. Cusick

Cambridge, UK: Open Book Publishers, 2021

<https://doi.org/10.11647/OBP.0226>

In this fascinating collection of essays, an international group of scholars explores the sonic consequences of transcultural contact in the early modern period. They examine how cultural configurations of sound impacted communication, comprehension, and the categorisation of people. Addressing questions of identity, difference, sound, and subjectivity in global early modernity, these authors share the conviction that the body itself is the most intimate of

contact zones, and that the culturally contingent systems by which sounds made sense could be foreign to early modern listeners and to present day scholars.

7.29.1 Maria Stuart

Translator: Flora Kimmich

Introduction by: Roger Paulin

Cambridge, UK: Open Book Publishers, 2020

<https://doi.org/10.11647/OBP.0217>

Flora Kimmich's new translation carefully preserves the spirit of the original: the pathos and passion of Mary in captivity, the high seriousness of Elizabeth's ministers in council, and the robust comedy of that queen's untidy private life. Notes to the text identify the many historical figures who appear in the text, describe the political setting of the action, and draw attention to the structure of the play.

7.29.2 The Atheist's Bible: Diderot's 'Éléments de physiologie'

Author: Caroline Warman

Cambridge, UK: Open Book Publishers, 2020

<https://doi.org/10.11647/OBP.0199>

The Atheist's Bible challenges prevailing scholarly views on Diderot's *Éléments*, asserting its contemporary philosophical importance, and prompting its readers to inspect more closely this little-known and little-studied work. This book is accompanied by a digital edition of Jacques-André Naigeon's *Mémoires historiques et philosophiques sur la vie et les ouvrages de Denis Diderot* (1823), a work which, Warman argues, represents the first publication of Diderot's *Éléments*, long before its official publication date of 1875.

In its illumination of the philosophical ideas underpinning the work, it provides readers with an understanding and appreciation of the complexity and literary artistry of Plato's *Republic*.
